(57) **ABSTRACT**

The present invention relates to a method of providing an individualized footwear for a user, operated in a computerized calculation system, the method comprising: obtaining one or more input data relating to the user, allocating the one or more input data to a plurality of attributes relevant to an individualized footwear, each of the attributes being associated with the one or more input data, calculating a parameter for each of the attributes using the one or more input data associated thereto, and providing individualized construction data for manufacture of the individualized footwear based on the calculated parameters of the attributes.
